

MIDDLEWARE MIGRATION READINESS ASSESSMENT (MRA)

Empower your Business for a Successful Migration

IO Connect evaluates your entire middleware implementation, including associated licensing and infrastructure.

How We Can Transform Your Business

Seamless Migration Planning

Develop comprehensive understanding of current infrastructure

Informed Decision-Making

Develop a TCO model for current and future architecture options

Aligned Technology Plan

Address business needs and data flows

Our Approach

Transform your infrastructure while you realize savings

One-Day Workshop

- Understand business model and objectives
- Assess current infrastructure
- Gather licensing and billing information
- Data flow evaluation
- Deploy necessary tools for in-depth analysis

2-Week Evaluation and Architecture Design

- Thorough evaluation of gathered data
- Formulation of a detailed architecture design
- A comprehensive understanding of current implementation

1 Day Workshop Up to **40%** Savings in Year 1

3 Week Turnaround Up to **80%** Savings in Year 2 Onwards

DELIVERABLES

- **Migration Roadmap**
Provide a step-by-step plan outlining the migration process and key milestones.
- **Estimated Cost Savings**
Deliver a detailed breakdown of potential savings, helping you make informed decisions.
- **Existing Architecture Documentation**
Document the current middleware architecture for clarity and reference.
- **Proposed Architecture Development**
Outline a comprehensive plan for the development of the proposed middleware architecture.
- **AWS TCO Calculator**
Utilize the AWS Total Cost of Ownership (TCO) calculator to assess present and future architecture options.
- **Recommendations Report**
Present a report with strategic recommendations for optimizing middleware efficiency.
- **Formal Migration Proposal**
Provide a formal proposal detailing costs, timelines, and steps for the migration process.
