Our experts will:

- Advise and establish the best practices for tracing and correlation strategy for your Mule applications and APIs.

- Install our Datadog Mule® Integration for APM in up to three environments: Development, QA, and Production.

- Instrument the Mule applications with APM to create traces in Datadog.

- Inject metadata to traces and spans to help in the creation of reports and dashboards.

- Mark spans statuses and HTTP codes appropriately.

- Correlate logs with APM traces.
